DETAILED ACTION

Election/Restrictions

1. Claims 6-23 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in Paper of 04 September 2003.

Specification

2. The disclosure is objected to because of the following informalities: It is respectfully pointed out that the character "E" appears in several places where -- degrees -- or -- ° -- should be. Also, on page 11, redundant claims 1-3 are present. Other errors may be present, so proofreading is recommended.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-5 are rejected under 35 U.S.C. 102(e) as being Anticipated by Sera
USPAT 6,559,913 B1.

As to claim 1, Sera discloses in Example 1, Figures 1-2f, (col. 6 line 15, through col. 8, line 29 and col. 4, line 34 through col. 6, line 14) an optical element consisting of a transparent insulating substrate, 1; a gate line, 7 (Applicant's circuitry layer), on the insulating substrate; and an underneath light-shielding film, 3 (Applicant's opaque optical shielding layer) (col. 6, lines 30-40), disposed to lie between the insulating substrate layer and the circuitry layer (per Figures 2a-2f).

As to claim 2, Sera discloses the optical element of claim 1, wherein the circuitry layer includes an active polysilicon layer, 5, (col. 7, lines 1-11) and the shielding layer is between the insulating substrate and the active polysilicon layer (per Figure 2b).

As to claims 3 and 4, Sera discloses the optical element of claims 1 and 2 wherein the shielding layer comprises Tungsten Silicide (WSi), (col. 6, lines 30-40) because it must withstand the temperature of annealing the polysilicon formation in a later step (Applicant's material that is unaffected by exposure to temperatures up to 1,100 °C).

As to claim 5, Sera discloses the optical element of claim 1 wherein the optical element is part of a liquid crystal display and the opaque shielding layer also functions as a light shielding film (Applicant's black matrix) for said display (col. 6, lines 30-40).
